I want to inspire others to  
tackle problems that  
feel too difficult to  
~~solve~~

in our lifetime. I want to be  
known for my actions and  
the energy that I create, I'm  
not the ideas man or the  
person who solved X, I am  
the leader of the  
brightest and most driven  
team to tackle health

Science problems. I want to mentor others and encourage future generations to build the future they want to see.

I want to encourage curiosity by including diverse people in my teams and encouraging a welcoming environment for people to share in.

I want to develop passion by guiding people to reach their full capabilities and

exploring even the smallest of ideas.
